

Police Equipment

Explosion-proof equipment rack

Name: Riot Control Equipment Rack

Expand: about 148*83*40CM

Shrink: about 148*40*12CM

Material: Metal

Weight: about 14KG

Craftsmanship: Folding corner welding spray moulding craft

Characteristics: Fast unfolding and folding for easy carrying

Use: Security equipment placement

Suitable for: schools; kindergartens; factories; stations; airports; docks; shopping malls and other government agencies, public security and law enforcement units, such as the use of security duty departments.

Compared to other styles of racks need to install and other functions, if you want to move to other places to use can not be loaded with a normal sedan-type law enforcement vehicles can only be disassembled, to the destination and then assembled thus wasting a lot of time, and the installation of the tools needed. Therefore, compared to other styles of shelves need to install and other features, the riot equipment rack has a rapid expansion of the storage and portable function, beautiful and elegant, well-made!

Tactical Square Shield

Name: Tactical Square Shield Weight: 1.08kg
Material: PC sheet Transmittance: $\geq 87\%$
Product Specification: 520*620*3.5mm Standard: GA422-2019 (riot shield inspection standard)

Construction: Double layer plate design, double grips, one-time high temperature moulding

Connection strength between handle and buffer plate: $>500\text{N}$

Strength of connection between arm and buffer plate: $>500\text{N}$

Impact Resistance: 147J kinetic energy impact compliant

Puncture resistance: GA68-2003 standard test tool 20J kinetic energy puncture conforms to the standard

Temperature adaptability: -20°C ~ $+55^{\circ}\text{C}$

Flame resistance: After leaving the open flame, the ignition time of the ignited place does not exceed 5S

Tactical Small Arm Shield

Name: Tactical Small Arm Shield Specification: 330*150*15mm
Material: PE anti-puncture cotton + nylon outer skin + elastic band Weight: 0.235kg

Construction: Multi layers of PE anti-stabbing cotton compression process, nylon grip, elasticated band to fix the arm

Features: This small arm shield is a kind of arm shield for close control of force, with covert and tactical arm shield, which can be suitable for public units to carry out the mission use. The outer lining fabric is nylon fabric, wear-resistant and durable, built-in soft anti-stabbing fabric, shock absorbing and draining anti-stabbing, anti-cutting, anti-club attack and small, flexible and portable design concepts, can effectively protect against conventional knives, clubs and other common equipment attacks; this arm shield is covert and convenient, can be applied to all types of combat scenarios, it is a service to grassroots, service to the actual combat tactical arm shield, quickly achieve armed protection, instantly wearable to complete the entry into the actual state of war! The arm shield can be rolled up and placed in the pocket of the backpack, which is especially suitable for the duty officer to carry out the task in civilian clothes. It is very convenient to pull and use.

Tactical Belt

Name: Multi-function tactical belt

Material: high strength nylon; engineering plastics, etc.

A multifunctional belt, including a main belt, an inner belt, and a police device assembly. The two ends of the main belt are provided with a buckle head and a buckle sleeve respectively, and the main belt 1 is provided with a first fixing strip near the buckle head and buckle sleeve side. The inner and outer sides of the two ends of the main belt are provided with matching Velcro, and the size of the main belt can be adjusted and fixed by the Velcro and the first fixing strip, which is convenient for operation and saves time. The main belt is provided with a number of second fixing strips, and the main belt is provided with matching velcro on the side in contact with the inner belt. The Velcro and the second fixing strips enable the main belt and the inner belt to be fixed to each other, avoiding the inner belt from falling off on the main belt. The inner belt is provided with an anti-slip strip on the inner side, which prevents the belt from falling off when the police officer is actually using it.

The police device assembly includes a handcuff set, a tear gas injector, a stick set, a magazine set, a work bag, a torch set, a pistol set, a multifunctional hook, and a mounting strap is provided at the back of the work bag, and the two ends of the mounting strap are provided with matching Velcro, and the Velcro is provided with matching fixed buckles. Through the role of Velcro and fixed buckle respectively, the work bag can be fixed on the main belt, not easy to fall off from the main belt, convenient for police officers to wear law enforcement equipment.

T-Baton Holder

Name: T type baton holster

Material: high strength nylon

Weight: 41g

Colour: black; white

Purpose: police law enforcement officers and security personnel on duty to wear baton use

Scenario: law enforcement officers patrol training, etc

This product can be fixed in the police duty belt above, placed T-baton and other riot baton use, using high-strength nylon fabric, with beautiful strong durable and convenient features, is the law enforcement officers go out on patrol to carry the riot baton a portable stick set.

Multifunctional capture bulletproof and stabproof briefcase

Name: Multi-functional capture bulletproof and stab-proof briefcase

Security personnel in the protection of important people, need to be equipped with the appropriate protective gear, such as bulletproof shield, restraining belt, carrying a bulletproof shield is very unsightly, and in public places when not in line with the need for covert protection. May cause panic among the masses and the detection of criminals, this product is a bulletproof and anti-stabbing briefcase with a restraining belt function, with easy to carry, beautiful and undetectable advantages. In the unfolded state, both hands are inserted into the first restraining pocket and the second restraining pocket respectively, and the first and second velcro layers are adhered as restraining straps. Apprehension and control of suspects, and hidden briefcase shape, further reduce the suspect's vigilance, easy to capture, minimise security personnel personal accidents and casualties.

In the unfolded state, one hand into the first strap and hold the second strap, can be used as an arm shield to bulletproof and anti-stabbing, easy to protect their own safety in close combat.
